JOBES FOR DELEGATE

Wichita Wants Him to Go to National Convention.

FRIENDS BOOM HIM Taken in time it can be

Seventh District Can Find No Better Man.

A. C. Jobes, delegate from the Seventh district of Kansas to the national Republican convention. This is something that the friends of this prominent Wichita the blood, the impure blood, friends, man would like to see announced by the press this spring, and they are already working to this end.

The movement has been under way for some time. Friends of Mr. Jobes in this city and throughout the Seventh district took up the matter some weeks ago and broached it to him. He was reluctant to allow his name to be used and has hardly consented yet. He says he has no time to devote to solicit, but the sentiment is growing to have him made a delegate from this district and Mr. Jobes has

agreed to go if elected. The movement has rapidly crystalized and he will no doubt be one of the lenders in the race for this honor. That Mr. Jobes has the ability and requisit acumen to represent the district at the convention with dignity and honor no one denies, and this fact will bring him sopport from every county in this distric when the matter comes up before the

Wichita ought to have the delegate to the convention and Mr. Jobes' friends will rally to his support and he will have a strong following when he enters the convention. If he is given the honor of representing the district at the convention, he will reflect credit both to Wichita and the "Big Seventh."

HOW ONE HORSETHIEF QUIT

Sherift Simmons Explains How They Were Treated in '71.

eaking of horse thieves and thieving office and get the answer. in this section of the country, Sheriff Simmons said yesterday: "I will tell you how they used to catch horse thieves the Friends university. Emma rode to in Kansas, I was coming to this country school on her wheel, and usually rode in 1879, and had stopped at Humbelt on by way of the Oatville postoffice. The the way down. I was standing out on correspondence continued during the the street and along came a mover who summer and fall, while at home the had attached to his wagon a beautiful young couple hardly spoke to each other. sorrel horse, one of the prettlest ani- On January 4th of this year young Joy mais I had ever seen. There had been a came to this city and went to Judge Haygood deal of horse and cattle stealing maker's court with the young lady and in the country then and I wondered what they were married. After the marriage the fellow was doing with that fine ani- the girl went back to school and the mal. Just so evil in the blood Wichita Wheelmen May Orcomes out in shape of ganize to Agitate Measures

FOR STREETS AND PARKS

Cycle Racing No Longer in Favor by L. A. W.

It was given out on good authority yesterday that the wheelmen of Wichita are seriously considering a plan of organization and will, when perfected, agitate the building of side paths onal I the Hood's Sarsapa-illa and happiness will principal streets of the city, and through the parks. This sentiment among wheel. men has been brought about by the strict enforcement of the bicycle ordinance which prohibits riding on the sidewalks, except during the wet spells, and even en with restrictions that are calculated to make the hump on the back of the wheelman decidedly tired. In Wichita it to make the hump on the back of the estimated that there are in the neighorhood of 2,000 persons who use wheels, and they think they should be entitled to the same rights which the laws of

ther states give to wheelmen. The plan is to petition for the building of four-foot paths along the streets adolning the sidewalk, these paths to be made either of packed cinders and sand or macadamized, the paths to be on one side of the street only. In the parks the paths should be six feet wide, as wheelmen would want to use the parks for pleasure rides, and there would be everal wheels on the paths at one time If the wheelmen of Wichita organize for

this purpose they will doubtless be strongly reinforced by the L. A. W., which is agitating the same measures in the east only on a larger scale, the legislatures of some states having approprinted funds for side paths along the ountry roads.

A prominent citizen and member of the L. A. W. who is interested in the matter sald yesterday:

"I believe the wheelmen of Wichita will demand better street privileges. If it were not for the dudes and nonsensical scorchers who think they have to go like a cyclone all the time, the wheel would be in better favor with the publie, but these fellows can still be regulated and disciplined on the paths as well as on the sidewalks. I believe we should have these side paths in Wichita. It is a movement in line with the League of American Wheelmen which will place all its machinery of agitation into the movement for side paths, where entire good roads are not immediately practical. Under the leadership of the League hundreds of miles of these paths have been built during the past year, and hundreds of thousands of dollars have been spent in their construction. In the state of New York alone nearly \$200,000 were collected for side path building, and much Pure Cider Apple Butter, per 5-7b of it has already been expended. So succossful has been this project thus far Pure Fruit Butters and Jelly, per can that it is freely predicted that many of Orange or Lemon Marmalade, 3

the states will be a net-work of paths within a short time. "While all of this good work has been done by the L. A. W. during the past ear, much more will be accomplished ing the present year, for the organizain has learned by the year the lessons of experience, and will be able to improve its work in every direction. This is portance to every bleycle rider, for the building of the paths, when undertaken in an organized way, is very simple and easily accomplished. But it is necessary for greatest success to have united effort, and the League expects many recruits to the rank for this work alone If it secures them the side path movement will assume proportions which will

"Another thing which is gradually putting bicycle riders much in favor," said the gentleman, "is the fact that the Leashould discontinue its control of a racing who had been thrown so hard that he building is only two stories, but is tion and wheelmen generally. During the last year the question assumed an acute stage owing to the opposition of a pure y racing body and because of the stand taken against the department by many of the leaders of the League. The statement was repeatedly made that racing tional Assembly discontinued this feature the organization would receive many "I would like to see some evidence of it applications from wheelmen who take in the tax rolls of this county." ture the organization would receive many greater interest in the more dignified objects of the lengue, such as highway improvement, securing of wheelmen's rights privileges, hotel accommodations,

W. has been constantly striving. ng, and as they have been the most oppowed to racing it is natural to suppose able effects of the action."
